

Make a list of each students' strengths and weaknesses based on results from their test and discussions you had while your group made corrections.

Student 1: _____	Student 2: _____
Student 3: _____	

Make your test corrections in the left column. On the right side, explain in words what concepts you struggled with on the test and which you will need to work at to improve your understanding of exponents. You should also include a new example that you create and solve that demonstrates the concept you need practice with.

Test Corrections	Concepts I Need To Study + Examples
