

- 1) Create a new project in eclipse called Grid World.
- 2) Click the Download link from my website (it's on the left side bar)

[Grid World](#)
[Grid World Install](#)
[Grid World Case Study](#)
[Grid World Code Download](#)

- 3) Open the GridWorldCode.zip file

Name	Date Modified	Size	Kind
build.properties	Apr 16, 2007 7:49 AM	4 KB	Document
build.xml	Apr 16, 2007 7:49 AM	4 KB	Text document
framework	Apr 16, 2007 7:49 AM	--	Folder
gridworld.jar	Apr 16, 2007 7:49 AM	102 KB	Java JAR file
javadoc	Today, 9:48 PM	--	Folder
projects	Apr 16, 2007 7:49 AM	--	Folder

- 4) Go into the **framework** folder
- 5) Copy or extract the **info** folder into your projects **src** folder.
- 6) For Grid World Part I and II, go into the **projects** folder.

Name	Date Modified	Size	Kind
boxBug	Today, 9:48 PM	--	Folder
critters	Today, 9:48 PM	--	Folder
firstProject	Today, 9:48 PM	--	Folder

- a) For Part I, go into the **firstProject** folder and copy **BugRunner.java** to your **src**.

Name	Date Modified	Size	Kind
BugRunner.java	Apr 16, 2007 7:49 AM	4 KB	Java Source File
info	Apr 16, 2007 7:49 AM	--	Folder

The contents of your src folder after setting up Part I

- b) For Part II, go into the **boxBug** folder and copy the three files to your **src**.
- 7) Refresh your project in Eclipse and you should be ready to go.
