

Eclipse 3.1

You need to do the following for every project.

1. Start a project as usual.
2. Select the project in the “Package explorer” window.
3. Select **Project -> Properties** from the menu.
4. Click on **Java Build Path** and select the **Libraries** tab.

5. Click the **Add External JARs...** button.
6. Navigate to the folder containing `gridworld.jar`. Select `gridworld.jar`.
