

Write code below that will do the following - try not to use your notes!

- (a) Create a list to hold int's.
- (b) Add the numbers 1 through 10 to the list.
- (c) Remove the value at index 4
- (d) Replace the value at index 5 with the number 20
- (e) Add the number 50 to the beginning of the list
- (f) Print out the size of the list
- (g) Add up all the numbers in the list using a for-each loop. Then print the sum.
